Dear humans <sup>?</sup> or aliens, who are reading this message! I am happy to tell that this message <sup>or</sup> includes description of ~~the~~ three events which I consider <sup>st</sup> most significant at present ~~the~~ 21st century. I hope you will find them interesting too.

The first event is the creation of the virtual reality system. It is believed to be very significant because of its amazing functions and opportunities for that it gives to the mankind. It allows to become a part of your own fantasy or to create something amazing. <sup>W m</sup>

~~And~~ The second event is the creation of atomic bomb and researches in of nuclear energy. Although it all started decades ago, nowadays the progress is near coming to the bottom. In the end nuclear energy might save or destroy everything. <sup>W m</sup>

The third event is a development of Elon Musk's space programme. He has already created his own satellites and even space ships and soon he will probably make some important invention. Musk himself tells the public that his plan is to colonise other planets and take human out the solar system. Indeed, if we <sup>sp</sup> break the borders of our <sup>sp</sup> home system, all universe will <sup>lay</sup> be before us. <sup>?</sup>

To sum up, I think my future readers will face some of these events. Anyway, I hope the nuclear war ~~won't~~ will not destroy this world before somebody reads that message. Enjoy the future!
