I have been long thinking over the idea of writing to you. Unfortunately, I cannot look into the future. However, I would like people not to forget history and past generations' lifestyle because their experience can be incredibly useful. I want to tell you about the three most important events of my time in my opinion.

A new virus called coronavirus has hit the world recently. This disease affects the Lungs and can be deadly. Fortunately, many people do everything in order not to get infected. They always wear masks in public places and try to keep their distance from other people. Different countries are doing everything possible to defeat the infection. I hope that soon it will become a relic of the past for us.

The second interesting event of my time is the creation of 3D printers. 3D printers are a huge breakthrough in medicine. Now people are learning to create human bones and organs with them. People will soon be able to create houses with large printers. I think your generation has already mastered this kind of technology.

Another interesting event related to new technologies is the creation of virtual technologies. Now people have begun to use them in medicine, business and video games. I am sure that your generation actively uses such technologies in everyday life.

We do our best to let your generation live better. If I were you, I would pay attention to some achievements of the past.
