Hello, future generations!

I have a great aim to tell you more about life of the people of 21st century. The life here is really difficult as our world is constantly changing. The modern humanity is still not enabled to solve global problems including political, ecological and economic ones.

45

I want to tell you about the most significant events happening at present. In February of 2019 ~~the~~ the massive pandemic spread out. People from all continents have to fight against for their lives as this virus, called COVID-19, can ~~lead~~ to harm lungs, sense of taste and even ~~can~~ lead to death. It's 2022 now, but we still wear masks and gloves to protect ourselves. There is a special vaccine, but the virus is ~~still~~ not deeply studied yet.

74

People have to fight not only against illnesses, but against ecological problems' consequences as well. There appeared huge fires in Australia, Siberia and near Amazon river. Ecological volunteers, firefighters and ordinary citizens of these territories tried to save our nature, there were organized many funds for raising gathering money, but it was not successful as many forests were destroyed by fire.

59

The war between two Slavic nations started in February of 2022. Ukraine and Russia, whose populations often called themselves brothers, participate in a huge weapon conflict ending in ~~a~~ countless deaths, violent sanctions and the ~~last~~ global frustration ~~and~~ hatred.

These events remark the process of humanity's learning how to deal with ^{these} problems without using weapons ^{and} punishment. ~~That~~ This period of history
