So, I have a chance to send a message to future generations in a time capsule. It is the really big deal for me, because it is my dream since I was a child. I really want to future generations know how do we live and spend our time today. I guess it so interesting for them. So, our days are the days of the modern evolution, we have the success in many aspects of our live, most of all in the computer deal. But computers and phones ~~change~~ ^{don't} books at all. A lot of people like to read more than use a phone to spend time. It is possibly that your generation forgot about books and papers. Nowadays the most biggest problem is the problem with ecologic. A lot of animal are already in the red book, we couldn't save them, it is very sad for our generation, and I hope your progress in biology as big as you can to save many animals or give a new live to animals which we ^{already} missed. Also I really hope that you don't have wars and you live in rest and peace, because ~~regular~~ regular wars it is the one of saddest mistake of our generation. We can't discuss our problem as people which live in one Earth, we start to kill each other, but I want to believe that in ~~the future~~ your generations ~~you~~ you forgot about wars and have a peace.
