Greetings, whoever is reading this. If you ^{have} found this letter it means I am probably dead. Your society may be developing that is why I decided to inform you about some significant objects in today's world.

First of all, technology is a serious issue nowadays and a lot of people do not know how to use it properly. Even more are experiencing problems in their daily lives because of smartphones, laptops, tablets. Do not allow kids under the age of eight use electronics.

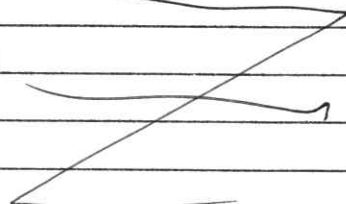

Secondly, failed parenting strategies have caused our kids to be depressed and unmotivated. The reason for that is the increased self-esteem of children. They feel like they can do anything when in reality their parents are doing all the hard work for them. So, no matter what let your kids experience the real life problems and don't solve everything for them.

Thirdly, consumerism is the biggest problem in our society. When money is the most valuable object everything starts revolving around it. Companies spend enormous amounts of cash for advertisements. As a result, people are buying things they want but do not need.

To sum everything up, I believe that these objects will be a lesson and a reference to the future society.

Regards, John.
