N 17

1) Brantain had been ~~so~~ courting Nathalie for two weeks.

2) Her decision depended on whether Brantain would ~~forgive~~ accept her explanations and ~~retain his interest~~ whether he would still want to court and marry her.

3) Harry said: "I came in with your brother, as I often do."

4) Brantain stopped being miserable; by the end of their conversation his face was radiant.

5) When they turned to retrace their steps, Brantain's face was radiant and hers was triumphant.

N 20

I suggest a title "A two-faced beauty". This story tells us about Nathalie and her relationships with two different men. I believe this title fits because while she expected Brantain to propose to her, she did not break up with Harry. Moreover, she found Brantain unattractive and still welcomed his company because of his wealth.

ТВОРЧЕСКОЕ ЗАДАНИЕ

Exploration of space is a quite new branch of science. Naturally, ~~the~~ the question of other intelligent life forms' existence & causes people's interest. However, the amount of effort that should be put in searching for other civilizations is up for debate.

To start with, there is a chance there are no other intelligent life forms in this universe and thus the attempts to reach them would be just wasting resources.

However, if intelligent life forms exist, there are several ways an encounter with them could go. First, our biological differences might make our perceptions of the world so different we might be unable to understand each other.

Throughout history, people had trouble understanding each other and coexisting, and it is entirely possible the same would happen with aliens. Therefore, these misunderstandings might ~~end~~ end in either a war or an attempt to ignore each other.

Second, ~~we~~ ^{we} might be biologically similar. Then the question of dominance would arise and humanity ~~might~~ ^{could} end up subservient to the other civilization due to being less technologically developed.

To sum up, I believe that attempts to contact other civilizations should be made without becoming the main focus of space exploration. First, ~~humanity~~ as humanity is not ready for
