5	<p>While we may lack the senses that animals utilize to aid their lives, we can use external devices, such as compasses, in combination with the ways animals use those senses to improve the quality of navigation in areas without satellite or cell tower connections. We can also build devices that measure the distribution of electric fields to navigate the ocean floor.</p>

20	<p>The industry is under strain from various factors which make renewable energy harder to achieve. Such factors include needless protectionism, rising costs and interest rates, supply chain issues and strict permitting rules from governments. This decidedly hinders the progress in renewable energy and harms the environment as a result, making the goals seem even more daunting.</p>
