ТВОРЧЕСКОЕ ЗАДАНИЕ

There <sup>is.</sup> ~~exists~~ an  
~~It is a common~~ opinion in the scientific com-  
munity that life exists not only on Earth, but  
also on other space bodies, and moreover we should  
send transmissions to try to reach them. However, ~~agreed~~  
~~many~~ many people disagree about the magnitude  
to which it should be performed.

25

A ~~large amount~~ <sup>lot</sup> of individuals insist that the search  
for extra terrestrial life is vital to the progress  
of humanity and should be prioritised above all else.  
Furthermore, the alien civilisations can provide us  
with advanced technology if we ~~we~~ contact them.

On the other hand, a common viewpoint in the sci-  
entific community is that there might not be  
any sentient life except us in the universe at all,  
and ~~and~~ even if alien civilisations exist, trying to find  
them is a waste of money. Instead, humanity sho-  
uld focus on its' own problems.

In my opinion, we should try to contact alien civi-  
lisations, provided that it does not cost too much mo-  
ney. Furthermore, ~~programmes~~ research on extra ter-  
restrial life ~~is worth~~ should be expanded and en-  
couraged ~~because~~ because it frequently is underfunded  
and neglected.

To sum up, a multitude of opinions and viewpoints exist on  
the topic of the ~~proper~~ degree to which we should try to contact  
extraterrestrial life. I believe that we should send transmissions

and encourage scientific research, but we also shouldn't forget about our Earth.
