ТВОРЧЕСКОЕ ЗАДАНИЕ

AI-based technologies have already been swiftly integrated into our everyday lives, including the education process. This has sparked heated debate about the pros and cons of using Chat GPT for studying. Can it really lead to the downfall of education and critical thinking?

Personally, I strongly disagree with the given statement. From my standpoint, it is essential for schools to implement such technologies in the education process.

Firstly, Chat GPT has proved to be a great managing tool, helping teachers to devise tests, organizing material and checking homework. This had has boosted the quality of education, as the time spent on manual, tiresome work has been reduced. Secondly, there is no use running from progress, as because Chat GPT is actively used in many spheres of life. A child would only benefit from the knowledge of Chat GPT's limits and capabilities. Nowadays, employers tend to hire people with a firm hold on ~~to~~ technologies.

In conclusion, I ~~incline to disa-~~ believe that using AI systems in the educational process does no harm to one's critical thinking. It is important to keep up with the rapid technological advancement and use it for your own good.
