ТВОРЧЕСКОЕ ЗАДАНИЕ

I disagree with the idea that Chat GPT may lead to the downfall of education and critical thinking, and here is why.

Firstly, let me state that Chat GPT and other AI programmes were initially invented to help us and not to pull us down. Artificial intelligence can come in handy during the education process, since it can provide, for example, more detailed explanations for solving equations or explain some scientific phenomenon in a more understandable language.

Secondly, I would like to point out that Chat GPT, roughly speaking, provide you the information that is already up on the Internet, it doesn't make up anything new. It doesn't give ready answers, it supplies you with all the information it had accumulated on a certain topic for you to choose from. Only people who initially lacked critical thinking will mindlessly copy everything from Chat GPT and consider it to be the truth. Smart people, however, will go through the information and pick out the needed one, because, as we all know, not everything on the Internet is correct, so even artificial intelligence needs to be doublechecked. Those who do this doublechecking will never experience the downfall of their ability to think critically.

All in all, Chat GPT, undoubtedly, can be put to wrong use, just like any other invention. Yet, if utilized correctly, it can and will prove
