ТВОРЧЕСКОЕ ЗАДАНИЕ

AI programs such as ChatGPT and many others have been becoming more and more popular among people of all ages in the last year or two. As a result, this fact has created a lot of discourse on the news and throughout social media, becoming a controversial topic and raising many questions concerning its ethics and safety, as well as the impact that AI may have on humanity in the future.

The claim of ChatGPT being a cause of the educational downfall is dubious for me, but I agree with it more than I disagree. Undoubtedly, AI has its pros in the area of education, providing students with help for their research and projects, as well as being an interesting item for studies in IT based schools and colleges. However, in my opinion, excessive use of such programs leads to people becoming less and less motivated to challenge themselves with various tasks, which really narrows their knowledge and makes it harder to learn. When all you need can be written in a push of a button, some may start feeling too lazy to even try, preferring Chat ~~to~~ GPT with its powerful search engine and the ~~ability~~ ability to form texts quickly. In conclusion, I think that our usage of AI needs to be responsible. People shouldn't lose their creativity.
