20	<p>In my opinion a suitable title for the story could be Music of the heart. Miss Meadows is a music teacher, and the music her students played changed alongside her mood, which was affected by the messages from her fiancée. The title depicts the nature of human interaction and references the story nicely.</p>

ТВОРЧЕСКОЕ ЗАДАНИЕ

With the creation of Chat GPT, one of the first neural networks available to the general public, many people voiced their concerns about the future of education and critical thinking. They claim that this technology would allow students to cheat more easily, which will impact the development of critical thinking and the ability to learn. I, however, completely disagree with that.

First of all, I believe that these processes can only be influenced from within. Only if a student themselves want to hinder their development can the change actually take place. Secondly, this exact same argument, which is based on protecting the children, has been around for hundreds of years. It was used ~~against~~ to undermine the benefits of television, radio and ~~and~~ even the Internet! But as time has shown us again and again, the worries are based on nothing. If human civilization didn't collapse from gaining unlimited access to most information ~~that~~ around the globe, it will surely survive Chat GPT.

~~In conclusion~~ In conclusion, I firmly believe that Chat GPT will have only positive effects on our world. Innovative technology like this shape the world around us. It is impossible to predict the next great invention, but I know it will be influential and change the world for the better.
