ТВОРЧЕСКОЕ ЗАДАНИЕ

Nowadays it is impossible to imagine our lives without computers and AI. One of the best-known AI systems in the world is Chat GPT. Some claim it can be ^{is} extremely useful for students as it can write an essay, a speech or any kind of text you need in seconds. But is it always a good idea to rely on technology instead of using your own brain?

As a student myself, I have tried using Chat GPT several times and found it useful for rewriting some sentences I didn't like ~~was~~ in my original work, choosing synonyms and better grammar structures. It definitely helped me do school tasks more efficiently, ~~learn new things~~ and expand my vocabulary.

On the other hand, I understand those who believe that such programs may lead to a downfall ~~is~~ of education and critical thinking and partially agree with them. If a person uses text-generators to compose an entire written ^{piece} ~~text~~, they are not training their brain and logic, and so their minds are not working hard. In this way, one's mental performance is not improved and it is no use to study if you ~~and that~~ do not enrich your knowledge. If a student ~~would~~ overuse AI, academic learning would lose its purpose and effectiveness ^{ie} ~~iveness~~. In my opinion, Chat GPT should be viewed as an assistant not as something that does the whole job for you.
