5	<p>Many human inventions have been inspired by or outright copied the nature. Such is the case with animal perception, due to humanity taking an interest in it. The natural way many aquatic species perceive their surroundings can teach people how to use the electric and the magnetic fields for exploration and travel of various bodies of water.</p>

20	<p>While the stereotypes of Europe being unprogressive and self-centered are partially true, this part of the world has a gift of fancy when it comes to science. The most famous example of that is CERN, a particle-physics laboratory. Such a project required different countries and people to put their differences aside, for a common cause, which the post-WW2 Europe achieved.</p>
