**ТВОРЧЕСКОЕ ЗАДАНИЕ**

Вариант № 3

It goes without saying that not only human's life is intelligent life in our world. We often think that we are alone in our galaxy. However, many scientists suppose that there are another forms of intelligent life on other planets.

First of all, we should convince ourselves that it is true. Secondly, prepare equipment to send something like message to be in contact. Of course, it is time-consuming decision, but, in my opinion, it should be done as soon as possible, approximately in 100 years. It is hard to wait, but worth doing. Also, it is well-known fact that we have a great variety of modern technologies. They can help us to struggle all the problems, connected with science, that is why I believe that new intentions will be casual occasions for us every day. If you ask me, I would like to see with my own eyes another intelligent life and even talk to "it". I find it very knowledgeable to communicate and exchange experience.

In conclusion, I firmly hope that one day people can contact with another intelligent lives because it is extremely significant for science and changing our world. This leap into the unknown leads to new experiments that can broaden our horizons
