ТВОРЧЕСКОЕ ЗАДАНИЕ

Nowadays Chat GPT and other AI systems tend to rapidly gain their popularity. Of course, they are convenient and that is why Chat GPT is widely used by students. Some scientists consider Chat GPT capable to damage education, but I disagree with this idea.

No doubt that Chat GPT is beneficial, it helps save your time and nerves when it comes to writing a diploma or a course work. Many students decide to "ask" AI to do all tasks for them and it makes their teachers and professors worry for educational system.

In my opinion, the development of AI will not bring significant changes into education. There have always been students intending to somehow cheat in the exam or not to "waste" their time on writing their course work. I think if they want to cheat, they will. Those students will either pay their groupmates for writing the work for them or just use Chat GPT. Cheating is an eternal problem and AI will not make it worse. I firmly believe that the quality of education depends only on student. If your aim is getting knowledge, you will do everything possible to achieve it.

In conclusion, I tried using Chat GPT and I have noticed a significant difference between its text and a text written by a human. AI systems ~~sa~~ cannot think critically and delve into the topic as deep as real people can.
