ТВОРЧЕСКОЕ ЗАДАНИЕ

In my opinion, messages and signals should be sent to contact with possible and predictable life forms on other planets.

The first reason for it, is that because it's very interesting to know if life can be possible on other planets, explore it.

Moreover, it can be useful for science and medicine, maybe other life forms can help with it. I mean, that cooperation would be a great opportunity in that case.

Another reason try to communicate with other life forms is just there are many experiments, so if people prove it, it would be a great discovery ~~of~~ in our planet.

I think, that if we unite our forces with other life forms, of course if the exist, we can make great discoveries of the Universe, live on other planets, find answers on our million questions about the space.

Personally, I would like to communicate with other life forms, speak with them, look at their appearance, make a photo, it is a great event.

So, ~~we~~ I think, that we should not stop trying to make messages to other life forms and contacting them, because there are many reasons for it
