ТВОРЧЕСКОЕ ЗАДАНИЕ

Think for yourself

Recently, there has been a heated debate around Chat GPT and AI in general. Although Chat GPT is a scientific breakthrough, it has had a detrimental effect on the public. It especially affects younger generations, people whose minds are easily influenced.

Having any kind of information accessible with one click leads to the downfall of critical thinking. If there is no need to research a certain topic, then there is no opportunity to develop analytical skills.

Another grave consequence of Chat GPT's popularity is cheating in schools and universities. Students do their homework using AI, rely on Chat GPT to carry out the research and complete their projects. By having AI do everything, students do not develop any useful skills.

And, above all else, there is no guarantee of Chat GPT's reliability. Its information is taken from big data bases with no way of telling what is true and what ~~is~~ is not. People who lack critical thinking easily believe anything Chat GPT tells them which leads to spreading of ~~for~~ faulty information and multiplying of misconceptions. ~~what~~ This, in turn, results in the downfall of public intelligence.

I fully agree with the notion that Chat GPT may lead to the downfall of education and critical thinking if no ~~mea~~ measures are taken to prevent it.
