5	<p>Actually, people can choose healthy food which isn't high in allergy-causing proteins and other elements which can trigger the allergy. Moreover, allergies can be different for every nation and particular person. That's because of the specific genetic of people living in certain place. If the allergy caused by genetic, a person can do nothing but avoid eating items which cause a bad reaction. But people can replace allergy causing products with similar ones but without particular elements which cause an allergy reaction.</p>

20	<p>Now it's possible to generate realistic AI fake. AI-generated images are high quality and AI is improving all the time. But people understood that online content can't prove something. Assuming trustworthy sources can identify themselves securely. Now, the fakes that thrive are mostly the funny ones.</p>
