ТВОРЧЕСКОЕ ЗАДАНИЕ

The existence of life on other planets is covered by mystery even until now. However, many scientists aspire to reveal the truth by sending messages to the space. Personally, I think people should ~~take~~ carefully look into this field and bring into operation some ^{scientific} approaches. /46

First of all, I reckon it is of utmost importance to send some satellites with radio waves receivers ^{to the cosmos} to ~~jump~~ a gun in connecting ~~to~~ to 'foreigners'. Moreover, the mechanism might be equipped with so-called space map which enable ^{the devices} ~~it~~ to travel around the cosmos. /48

Turning to other measures, scientists could track the location of the satellites and send spacecrafts with professionals to examine ~~the~~ the areas. Provided there are no specialists for executing such a mission, scientists can just observe the cosmos using the cameras on satellites until they mention any changes of general sights or mysterious movements. /45

All in all, I believe that searches for intelligent creatures ~~outside~~ of our planet are not in vain and will definitely bear fruits in the future, especially if we will use the methodes, suggested above. Consider at least the unidentified flying object, 'foreigners' are looking for us too! /48

A: 2+2+2 → 6

B: 2+3+3+1 → 9

C: 2+3+1+2 → 8
