ТВОРЧЕСКОЕ ЗАДАНИЕ

Is anyone there?

Nowadays more and more money is invested in searches for intelligent alien life. Scientists of all over the world work every day to confirm that we are not alone in the universe. In the course of human history so much has already been done, but no luck yet.

People have sent different kinds of messages into space, varying from radio messages and to samples of art. What else can we do to find even the smallest evidence of extra-terrestrial life? In this essay I will list my suggestions on this topic. /90

I think that it would be reasonable to create more rovers and space crafts to gather data about planets more efficiently. What's more, it would also be a great idea to widen the boundaries of the territory under the investigation, so that the chances of finding life would rise. And the last idea is to head straight to the planets that have more chance of supporting life and not waste our resources on the planets with harsh conditions that would definitely not contain any intelligent life. /86

At the end of the day, if there was any intelligent life, they would try to reach out like we do. And if somewhere in the universe this life actually exists, /81
