20	<p>In my opinion, "The Love Triangle" would be a perfect title for this fascinating story as long as it refers to the relationship between a very attractive girl Nathalie and two gentlemen Brantain and Harvy whom are deeply in love with her. Though the whole story is exciting, the ending of it seems quite confusing.</p>

ТВОРЧЕСКОЕ ЗАДАНИЕ

Nowadays, some scientists believe there are intelligent life forms on other planets and we should send them messages in order to contact them. Well, I guess it is a rather debatable idea and now I will explain why.

To begin On the one hand, sending a message to space for finding different life forms seems like a very brave and innovational movement at the same time. With its help, we could prove a popular theory that ~~in our galaxy~~ we are not the one who have minds in the galaxy and other living creatures are also exist. Moreover, it will make a huge contribution to the science as well as ~~devetop~~ increase our knowledge about the universe.

On the other hand, it might be a great danger for our civilization and sending a sigh from the Earth to space is quite risky as we don't know ~~much inform~~ have enough ~~&~~ information about ~~the~~ galaxy to send a message. So ~~think~~ To sum it all up, I could say that sending messages to other planets in order to find other intelligent life forms will make a development in science but can cause to an extreme danger or a failure. Anyway, it would be fascinating to see living creatures on other planets and ~~ho~~ how they look.
