| 20 | <p>Love defines your mind. I find such a title appropriate because the text is about a woman whose mood and behaviour depended on the news from the man she loved. When he was about to betray her, she got angry with her students, but as he changed his mind, she became happy and cheerful again.</p> |

ТВОРЧЕСКОЕ ЗАДАНИЕ

Nowadays, as science is developing rapidly, people argue about modern technologies and their influence on the society. Chat GPT is what especially concerns us today. Nobody knows, whether it is a bless or a curse.

Some people claim that Chat GPT leads to downfall of education, as plenty of students use it to do homework. Therefore, they are likely to lack critical thinking because they simply do not need it. Chat GPT does everything for them, which is a disaster.

There is a different point of view to be discussed, though. There are those who state that Chat GPT enables students to thoroughly analyze information they get from AI. Personally, I support this view as well. To my mind, we still have to check the work completed by Chat GPT, so we learn to study hard, to be careful and attentive. Moreover, we understand how to do some tasks, ~~as AI shows us~~ as Chat GPT offers some tips. Therefore, I quite disagree with the first opinion.

To sum, I would like to say that heated debates about the impact of Chat GPT are liable to continue. Still, I support working with AI and learning more due to it. It is up ~~for~~^{to} us to decide how to use it effectively.
