ТВОРЧЕСКОЕ ЗАДАНИЕ

Nowadays, AI systems like Chat GPT have an influence on most aspects of our lives, which includes education. Many people believe that Chat GPT may lead to the downfall of education and critical thinking, but is that really so? This essay will dwell on this question.

To begin with, Chat GPT might be harmful for education due to the fact that it can complete students' assignments for them, which will undoubtedly negatively affect their education. Moreover, some teachers use Chat GPT to determine whether a student's writing assignment was done by AI and often Chat GPT wrongfully takes credit for completely original work, which may ~~to~~ lead to wrongful accusations of cheating.

~~Moreover,~~ However, Chat GPT and other AI systems can be used to ~~use~~ enhance the quality of education. Chat GPT can be used to create short summaries of texts to help students understand the subjects better or ~~to~~ tasks to help them prepare for tests and exams. AI can also be used for learning a new language since one can hold a ~~conv~~ conversation with it in almost any language to ~~pr~~ practise it.

In conclusion, I believe that as long as it is used responsibly AI systems can be beneficial for education and improve it by creating new materials and ~~to~~ helping students practise.
