ТВОРЧЕСКОЕ ЗАДАНИЕ

In the recent years, all forms of artificial intelligence developed rapidly. Due to this sudden and unexpected breakthrough, some companies decided to get profit out of their creations. Thus, some AI systems began being spread ~~to the~~ for mass consumption. One of those systems was "Chat GPT", a powerful tool made by OpenAI with the original intent being helping programmers and software developers. Nowadays, this clearly is not what it is used for.

After the discovery of the bot's amazing capabilities, some people began promoting the idea of using ~~the~~ ^{the} ai's chatting power to make it write essays and texts. This became an issue, as it is near impossible to differentiate a text written by an ai from a human-made one. Suddenly, student all around the globe began exploiting this for getting higher grades at school. ~~Some tried to combat~~ Consequently, the people who relied on Chat GPT for achieving academic success, started forgetting how to work themselves. Since this "easy way" exists, there is no ~~incentive~~ incentive to learn and study. As far now, ~~there is not~~ a clear way to combat this does not ~~exist~~ exist. It is up to the student to decide whether he uses the ai or not.

To conclude, I do ~~believe~~ fully believe that Chat GPT is leading to the downfall of education.
