ТВОРЧЕСКОЕ ЗАДАНИЕ

As AI and chat GPT are developing rapidly, some people believe that they may suppress creativity and jeopardise the development of our society. In this essay, I want to outline my point of view on this issue.

First of all, the main concern about artificial intelligence is that it can replace many essential creative professions. It is already able to design posters, translate texts, write essays, and successfully accomplish other things that were previously done only by force of human brain. Therefore, people <sup>may</sup> ~~might~~ become less imaginative, as the necessity for it will disappear. <sup>Even</sup> Pupils and students <sup>currently</sup> use ~~to~~ <sup>AI</sup> actively, which is really disappointing.

On the other hand, technological progress has never been static. For instance, after the Industrial Revolution, many employees <sup>have</sup> lost their jobs as well. It is an endless process that we cannot prevent. That is why we <sup>it is crucial</sup> ~~need~~ to use AI wisely. <sup>In case of succeeding,</sup> ~~If we succeed,~~ we will get an incredible tool that will change our world for the better.

Taking everything into consideration, ~~it is~~ I truly believe that we should not be afraid of GPT. However, there should be certain boundaries between AI designs and real human art. A truly <sup>talented</sup> ~~creative~~ person will always be appreciated, and it is urgent to encourage creative and critical thinking in people.
