ТВОРЧЕСКОЕ ЗАДАНИЕ

Throughout the last couple of years Chat GPT has become a technology that is applied in various fields. Due to a popular belief, it may cause the downfall of critical thinking. I tend to ~~think that~~ disagree with this idea and my reasoning will support my point of view.

To begin with, the appearance of any technology causes a negative reaction in the public's minority. Nevertheless, neither smartphones nor Internet connection didn't stop the development of humanity. It's highly likely that all the criticism is based on the fear of something new.

Moreover, we are to choose whether Chat GPT will stimulate progress or regress. Obviously, it is a tool that may make our life easier, but it would be beneficial for those students who experience difficulties in studying. It would encourage them to enlarge knowledge and broaden the boundaries of the familiar world.

The last but not least, Chat GPT would outline the weak spots of the curriculum. New profound formats will be created to avoid cheating. Changes are to be done with the development of technologies, that's how the world works.

All in all, all the above makes me sure that Chat GPT is not likely to cause the sudden downfall of education. Similar cases have been experienced and they mainly improved the education.
