ТВОРЧЕСКОЕ ЗАДАНИЕ

We cannot deny that the role of artificial intelligence in our modern life is tremendous. For instance, Chat GPT can create pictures or essays, solve different physical or math tasks, and so on. Some people believe that in the nearest future AI systems will become far more intelligent than humans. It means that people won't be in need of ^{critical} thinking or imagination. Education won't be crucial at all. Do you believe in it?

Frankly speaking, I don't. Nowadays, all AI systems use only the information presented on the Internet: e-libraries, web-sites or ~~videos~~ educational videos. AI doesn't ~~int~~ invent something ~~itself~~ itself, it just takes all the necessary ~~inf~~ facts and forms an essay or an article. I want to say that, anyway, all the works of AI were written by people, ~~and put on the Internet~~, it just presented a shorten version to a user.

To sum everything up, I would like to say that we shouldn't overestimate the abilities of AI. Even in ~~era~~ ~~of techn~~ the modern reality it doesn't have imagination or critical thinking. That's why ~~people~~ education is still of primary importance for people. Nothing will replace human brains ~~at~~ at least in forty or fifty years. If ~~someb~~ someone asked me about the threats of AI, I would answer that I don't agree with all the people's worries.
