The project I am currently working on is aimed at revealing may Chat GPT lead to the downfall of education and critical thinking. I would like to discuss it and tell my opinion about the issue in this essay.

Chat GPT is a very useful AI system. Everyone can use it for help, to know something new, ⁱⁿ learning and other useful things. It is not ordinary for people to know that technology can help them.

In my opinion, Chat GPT can be useful in studying and critical thinking. It is very impressive that such AI system exist in our world. A person just need to ask something and AI system will answer him or solve this problem! I suppose, Chat GPT will not be bad for people in the future. Everyone is needed to develop our world, life, especially technologies. This AI system could be a wonderful assistant for everyone.

In conclusion, I am strongly convinced that Chat GPT like other technologies may be a great assistant for us: help in studying, solve a problem and many other things. Everyone can improve the whole world only with this technology.
