It goes without saying that some people believe that Chat GPT may lead to the downfall of education and critical thinking. Personally, I agree with this idea. Actually, many people use it nowadays to ~~do~~ ^{help} their homework tasks faster or to make some texts for their projects. It really helps them to save the time. But there is another side of one coin. Although Chat GPT is considered to be a robotic system which doesn't make any mistakes, it does. So, these "masterpieces" are quite easy to recognise even if you are not an expert. Some general facts may be misinterpreted. According to this fact, ~~that~~ a lot of essays written by Chat GPT are just incorrect because the information it uses is controversial and ~~unreliable~~ ^{unreliable} ~~unreliable~~. From this point of view, Chat GPT can't replace our mind skills.

However, it makes people lazier. Such comfortable conditions make people adapt quickly. It is a kind of bad habit which can affect our lives. This way, academic level ~~will~~ ^{will} be ~~decreased~~ and critical thinking ~~will~~ ^{will} be decreased.

In conclusion, I would like to mention that Chat GPT and AI have more ~~the~~ ^{than advantages} shortcomings, so they lead to the downfall of education.
