Chat GPT: Downfall or Thrive ?

Artificial intelligence had pretty much taken over the world in a short time span. Such programs as Chat GPT quickly became popular due to its ability to complete numerous writing tasks in a second. It is capable of writing any type of text the user wants, but can it lead to the downfall of education and critical thinking?

Undoubtedly, Chat GPT had become a vital part of the lives of students, office workers and anyone who uses internet. It can convert your request into fabulous and well-written text within a second. People use Chat GPT to save time and it's perfectly dealing with it's function.

However, such thing became a mass problem: students are using Chat GPT to cheat by making it write their assignments, leading to their ability to think critically and independantly from the technology decrease. It resulted in the huge reliance on technology as some of the students are unable to write on their own anymore.

In conclusion, I would say that Chat GPT is a great and helpful program that would certainly ease your work, but it is only useful when people do not overuse it and are able to rely on their own intellect any time they need to finish some writing task.
