ТВОРЧЕСКОЕ ЗАДАНИЕ

Nowadays Chat GPT is widely used in many spheres. This state-of-art technology is making a huge impact on our education and the way we think in general. The thing is, are these changes positive or negative?

To start with, I believe that <sup>not only</sup> Chat GPT did not take away critical thinking but also provided us with new forms of it. The proper usage of GPTs enables people to develop their soft skills and makes it ~~even~~ easier to collect and analyze the needed information. ~~As the machines are not able to actually experience anything, people will always win and~~ <sup>Besides,</sup> by using chat GPTs you can simplify your tasks at some steps but not the whole work. Therefore, chat GPT creates new forms of critical thinking and works as a supplement to humans' work.

Moreover, in terms of education chat GPT is a more dangerous thing because children, being immature and unconscious can use <sup>the</sup> technology carelessly. If children are not taught how to make a proper use of GPTs, it may lead to <sup>devastating circumstances</sup> ~~the decrease in the whole level of education among youngsters and the downfall of creative and critical thinking~~. I am firmly concerned that this ~~is~~ will be a drawback of education policy, not of Chat GPTs themselves.

Summing up, people have always faced difficulties with new technologies and GPTs are not

the exception. The key point is to learn how to ~~use them properly, how to benefit from~~ them. For this reason, I believe that the downfall of education and critical thinking can only be caused by ~~the measures~~ or the lack of measures taken by humans ~~in order~~ to learn how to make ~~a proper~~ use of GTTs.
