ТВОРЧЕСКОЕ ЗАДАНИЕ

I disagree with this idea as I think the opposite. The time never stops and people invent more and more different devices to make their life easier. Chat GPT is a bot to which you can talk to, if you feel lonely or ask it any question and it will answer you the next second. Nowadays many students ~~you~~ use it to write their essays or get good marks at tests. Basically, people think that it will lead to the ~~downfall~~^{downfall} of education and critical thinking because chat GPT makes all the work for them, but I disagree. I think that chat GPT won't affect on education, it may even help. Teachers can ~~go~~ use GPT to make their lessons better and more educative as this chat ~~is~~ makes a research through the whole Internet to find what you need. When students use GPT they still make their brain work. They need to ~~ask~~ form a question they want to ask, and when they get an answer they have to look through it to find any mistakes, because even chat GPT is not perfect!

~~s~~ Students can find there some words that they don't know, so they have to look it up and remember it. Eventually, students will write many exams without the use of ~~phone~~ and chat GPT, that's why they still must care about their knowledge level.
