ТВОРЧЕСКОЕ ЗАДАНИЕ

I actually agree to some extent that Chat GPT may lead to the downfall of education and critical thinking, but not completely. Of course, AI takes a big part in our lives already, but it can not be that significant.

From the one side, people have started ~~massive~~ massively using Chat GPT for generating essays or presentations. It completely removes the point of the work and can be equal to cheating. Even if you are squeezed in time, it can write you a huge text, depending on the theme you want, in seconds. The result is best mark or high percentage of the test.

From the other hand, Chat GPT can not help you if you are performing like unprepared. That is the point, where education and developed critical thinking win, even if you are not familiar with theme of performance. Another great disadvantage is that Chat GPT can only consume processed ~~info~~ information and learn from it. It means that if humankind will need to solve the problem that has never ever been known before, Chat GPT could not give a solution because ~~it never~~ it had never had any information about it. That is when <sup>the</sup> greatest human minds step in.

To conclude, AI might have influenced our education, but it did not replace the human critical thinking.
