Вариант № \_\_\_\_\_

2	16	+ 1) She had a certain fine, rich coloring that belongs to the healthy brune type. 2) She was confidently waiting for him to declare himself and she meant to accept him. 3) 4) 2) but it makes so much difference to me what you think of - of me. 4) Of course I do want you to understand that Mr. Harry is an intimate friend of long standing.
5	17	+ 1) He had been counting her for two weeks. 2) It depended upon a good deal. 3) I came in with your brother, as I often do. 4) He was gaining hope during the conversation and in the end misery disappeared from his face. 5) When they turned to retrace their steps, Brantain's face was radiant and hers was triumphant.
	18	+ 1) made him more brave. 2) eyes gazed 3) mixed with 4) that little meeting 5) who is known for a long time
	19	
	20	4 "Unexpected encounter" In my opinion, this title suits the story well as it fully represents the main event in the story, which causes a threat of ruining couple's relationship. It also highlights the fact that it was not done on purpose and Mr. Harry did not have intention to get Mr. Brantain away from Nathalie.

## ТВОРЧЕСКОЕ ЗАДАНИЕ

Some scientists think there are intelligent life forms on other planets and messages should be sent to contact them. To what extent do you think it should be done? Write an essay to argue your point. Write between 200-220 words.

Nowadays many scientists suppose that there might be intelligent life forms on other planets and mankind definitely should try to contact them. We can't be sure whether other forms of life do exist but in my opinion it is worth trying to set up communication with them.

Although people have already explored rest of solar system, the universe doesn't end there. In fact, it is endless and so many scientists suppose that there are plenty of planets similar to Earth, with almost same conditions. That means the chances of these planets having some kind of life on them are really high. However, the biggest problem is that these planets can be not just outside solar system but even in different galaxies. These distances are so high that not a single rocket can make it. For this reason people won't be able to visit these planets in the nearest future. But we should not stop and continue to upgrade our technologies. We also should look for more Earth-like planets and study their conditions.

To sum up, I would like to say that I am sure we are not alone in the universe, that is why should continue researches in space and eventually we will find another life form that can even be more intelligent than mankind.
