ТВОРЧЕСКОЕ ЗАДАНИЕ

7 The development of science and technology, especially with
12 the newly-gained astronomical knowledge, brought
20 up the question of other intelligent life forms
24 existing. Scientists are attempting to find any
34 evidence of it, to contact alien creatures,
42 assuming that there are some in our universe.
49 However, is there any extent for such
58 studies? Actually, there is a bunch of reasons to
64 limit the efforts in this field.

71 Even with its possible positive effects, contacting
~~77~~ other civilizations has its downsides. Firstly,
85 the expenses on production of devices, suitable for
92 exploring the universe and possible alien species
100 are enormous due to the need in advanced
106 technologies and rare materials. The excessive
114 spending on it may put at risk other
119 astronomical researches. Secondly, learning more
126 about fundamental reasons ^{for} of the existence of
132 intelligent life forms may undermine basic
140 principles of the social life and eventually lead
149 to a crisis, the result of the change in
156 values and perception of the world. Furthermore,
162 warning alien civilizations of our planet
169 may cause conflicts and competition for the
173 resources which ~~would~~ might ~~endage~~ endanger
175 the humankind.

183 To sum up, the successful contact with other
190 intelligent forms of life would be an

220 of careful analysis of pros and cons.
