ТЕСТ. БЛОК 2.

10-11 классы

Вариант № \_\_\_\_\_

16	<p>1.) She had a certain fine, rich coloring that belongs to the healthy brune type. 2.) She was confidently waiting for him to declare himself and she meant to accept him. 3.) They were taking of indifferent things which plainly were not the things that occupied their thoughts. 4.) She approached Brantain with a delicious frankness of manner when she saw him there; She was apparently very outspoken.</p>	4+
17	<p>1.) For two weeks past he had sought her society eagerly and persistently. 2.) Nathalie forgive Harvy, if Brantain would think that Harvy is Nathalie's brother. 3.) I came in with your brother, as I often do. 4.) Brantain's mood was misery, but after it had been happiness. 5.) When they turned to retrace their steps, Brantain's face was radiant and hers was triumphant.</p>	5+
18	<p>1.) made him brave 2.) looked for a long time 3.) went together with 4.) that short meeting 5.) long-lasting</p>	5
19	<p>1.) eagerly 2.) challenge 3.) bagged - 4.) worried 5.) simple / honest</p>	4
20	<p>In my opinion the text can be called "Love for money" because the main character Nathalie didn't love Brantain, as he was unattracted, but she loved his wealth and liked being surrounded by luxury things. Moreover, Nathalie had to pretend that she carried of Brantain to become his wife, as she thought about money more than through feelings.</p>	1

### ТВОРЧЕСКОЕ ЗАДАНИЕ

Some scientists think there are intelligent life forms on other planets and messages should be sent to contact them. To what extent do you think it should be done? Write an essay to argue your point. Write between 200-220 words.

Some scientists claim that there is a high probability of intelligent life on other planets, and advocate sending messages to establish contact with other civilizations. I must say, I partially agree with them.

On the one hand, it is natural curiosity of humankind and the desire to explore the unknown. We believe that communicating with intelligent beings from other galaxies can lead to revolutionary discoveries, to expand our horizons in understanding and potentially benefit humanity through the exchange of knowledge and ideas. However, scientists agree that the chances of getting an answer are quite vague, as distances between stars are vast, the limitations of modern technology are high. Moreover, there may be risks and negative consequences such actions. We may come into contact with alien species that may pose a threat to our galaxy. In addition, if we reveal our existence to some more advanced civilizations, they may have different intentions, some of which may be quite bloody.

All in all, I believe that it might be an interesting experience, but any decision should be made with careful consideration, taking into account scientific and practical factors. Such a decision should be made with international cooperation to ensure the best outcome for humanity and the universe.
