ТВОРЧЕСКОЕ ЗАДАНИЕ

With the rise of AI such as Chat GPT, a lot of people have expressed their concerns about it. Some have even gone so far as to say that it may lead to the downfall ~~of~~ of education and critical thinking.

While I do not believe that Chat GPT ~~will~~ and similar AI will affect society that much, I agree with the idea to an extent. I think that AI will not do any good to education and critical thinking. In fact, it will likely have a negative effect on both of these things.

First of all, Chat GPT and similar AI can negatively impact education. AI is trained on text from the internet, and this text is not always fact-checked. This means that any text generated using AI can carry a lot of misinformation.

Second of all, Chat GPT and similar AI can negatively impact critical thinking. Many students nowadays use Chat GPT to create school essays, projects and other things. Because the text is generated with AI, the student does not do much thinking, if they do any thinking at all. And this is not only ~~true~~ the case for students and their work. YouTubers and ~~real~~ writers can* do this as well.

In conclusion, while AI will not lead to the downfall of education and critical thinking, it can negatively impact both of them.

A large rectangular area with horizontal ruling lines, intended for writing answers. A large, hand-drawn diagonal line crosses the entire page from the top-left to the bottom-right, effectively dividing the writing area into two triangles. There are also some smaller, faint hand-drawn lines and curves within the ruled area, possibly indicating a specific section or a correction.
