ТВОРЧЕСКОЕ ЗАДАНИЕ

Currently, the innovation called Chat GPT gains its popularity both throughout the Internet and social media. More and more people are willing to fully explore Chat GPT's functions and when needed resort to its ~~help~~ service.

To ~~begin~~ begin with, there is a ~~hot~~ heated argument around Chat GPT's advantages and disadvantages. One of the strongest points is that the brand new innovation slowly leads to the decline in the level of education in general. Personally, I believe that it is severely overstated, though I should admit that Chat GPT impedes people to think outside the box indeed.

On the ~~contrary~~ contrary, those opportunities which AI offers can undeniably find their use in various areas in the postindustrial ^{trial} world. Chat GPT is able to produce diverse texts on different complex subjects. The new technology can even generate any photo or a short clip according to your research. In some cases Chat GPT might be applied in university ^{ties} to facilitate the studying process.

To sum all this up, Chat GPT truly has its draw^{aw}backs on which we should not close our eyes. At the same time, besides its shortcomings, the ~~artificial~~ Artificial Intelligent can ^{boast} ~~praise~~ ^{cannot} ~~praise~~ upsides, that, I reckon, outweigh negative sides. This way, I ~~can't~~ ^{cannot} let myself agree with the idea that Chat GPT may lead to the downfall of education and critical thinking.
