ТВОРЧЕСКОЕ ЗАДАНИЕ

Nowadays artificial intelligence is surrounded by debate. Undeniably, such technology as ChatGPT plays certain role in the development of modern society. Conversely, this influence is not mostly negative and does not lead to disastrous consequences as predicted by particular individuals. In this conflict I take a rather positive approach for ~~few~~ various reasons.

First of all, Chat GPT and artificial intelligence stay at a relatively low level of development. Compared to the capacities of human brain. The functionality of such instruments is based fully on mechanical algorithms, which have a limited number of components and poor results in creative tasks when <sup>an</sup> algorithm is not provided.

Additionally, <sup>artificially</sup> most of the jobs which require human interaction and complex analysis of the data provided can not be fulfilled by Chat GPT.

Another argument is that the use of Chat GPT might only benefit education. AI is a powerful tool which can provide a brief summary of a vast scope of data.

Considering all of the above, chat GPT might become a valuable instrument with a wide sphere of application.
