ТВОРЧЕСКОЕ ЗАДАНИЕ

Chat GPT: human's best or worst invention ever?

Chat GPT has become immensely popular recently. Many great achievements, as well as scandals, are now connected with AI. It is one of the most controversial inventions, especially considering its impact on education.

Last year one Russian student confessed to the press that his diploma was written with the usage of Chat GPT. Can we claim that this person is a good specialist in his area if he needs help when writing such an important work? In my opinion, we are currently on the verge of reforms and changes in many spheres of life. Creativity will be valued more and more, yet to what extent? The invention of a calculator did not lead to people stopping to count. Chat GPT can become useful as well. It is utterly important for teenagers not to use Chat GPT, otherwise they will not develop any brain skills. Yet, adults can treat AI as assistants. They will notice the mistakes AI does and only use it as a source of inspiration.

To summarise, it is important to start to regulate the usage of AI. There is a need for legislature which will strictly frame the ways Chat GPT can be used. AI will not lead to the downfall of education if we treat it the right way.
