## The Artificial Downfall

The use of artificial intelligence has been a widely discussed topic for the past several ~~years~~ years. Every person uses various reasons to align themselves with a certain side. This essay will cover the aspects of history and modern nuisances.

Let us first look from a historical perspective, when the internet has first appeared. Everyone used to think that with the help of those machines, human's critical thinking will be harmed. However, the use of internet has helped us to raise the level of education, while also enhancing our critical thinking.

Now we should look from a contemporary perspective. Chat GPT has enabled many people to become creative, since it has started to provide people with answers. Consuming these answers people are educating themselves on various topics without having to spend hours. Thus, Chat GPT may provoke enthusiasm in people and develop their critical thinking while inarguably raising the level of education.

In conclusion, it is ~~also~~ important to mention that the introductions of new technologies have not yet harmed person's critical thinking or education. While the credibility of some information can be questioned, the benefits of Chat GPT are surely visible, and some are yet to ~~be~~ be discovered. Chat GPT will surely not lead to the downfall of education or worsening of critical thinking.
