ТВОРЧЕСКОЕ ЗАДАНИЕ

The majority of people consider Chat GPT as the main reason for the collapse of a stable educational system and regress in people's skill of thinking critically. However, this statement is quite controversial and could be discussed from a different perspective, I suppose.

It is important to mention that everything depends on a human's personal attitude towards the usage of Chat GPT. Some people view this system as a useful tool for studies, others — as an easy way to cheat, for example. I am sure that Chat GPT will not dominate over the traditional teaching methods, since it will need to develop its own character and adapt to each person's studying speed. Seeing all this done just by an artificial intelligence looks impossible.

Additionally, if people refuse to study and experiment, there will be no new sources of information for Chat GPT. This will end up with artificial intelligence using the old data again and again, slowly becoming useless. Therefore, humanity will face the need to develop their critical thinking, anyway.

Concluding, I doubt the fact of Chat GPT causing the downfall of education and critical thinking. This system will never replace teachers or lead to humanity's abt loss of ability to think critically.
