16	<p>1) Someone someone who stood there bleeding to death, pierced to the heart, to the heart, by such a letter</p> <p>2.) younger girls began to feel positively frightened "Meady is in war"</p> <p>3.) younger girls began to feel positively frightened ("The older girls were in crimson; some of the younger began to cry")</p> <p>4.) on the wings of joy, hope, of love, of joy ...</p>
17	<p>in such a strange, strong voice that the younger girls began to feel positively frightened</p> <p>1.) Basil wrote that he was feeling "more and more strongly that [their] marriage would be a mistake" and that the "idea of settling down" filled him with nothing but disgust"</p> <p>2.) After reading the letter, she turned upset and chose "A lament" from which one could scarcely help shuddering" while her uplifted mood the music changed for more joyful 3.) She was thirty. 20	<p>Considering the plot of this story, I would propose a title "Flowers fading" to "Flowers fading, Flowers Blooming" which rep represents the story metaphorically. First and foremost, the flower motives appear both in the songs Miss Meadows chooses to rep reflect her mood and in her own personal life (even the surname asks for it). Besides, if a plant starts to fade, it does not mean it is going to decay instantly. If it is nurtured, or given better conditions, it is going to bloom again, just as the relationship.</p>

ТВОРЧЕСКОЕ ЗАДАНИЕ

→ Some enthusiasts question the idea that ~~artifical~~ artificial intelligence is the adversary to the modern education and critical thinking. You would never find me amongst them as I consider utilities like Chat GPT nearly the most dangerous thing ~~to things~~ not only to human creativity, but to studies as well.

~~First and forem~~ First and foremost, I would like to elaborate on what neurons are used for. Most of them are applied when a gigantic piece of work is needed to be done in a short period of time or when there are not enough of professionals in the art sphere. Thus the companies start generating images and texts in order to get the ~~quite~~ quickest result. Considering the availability of this kind of AI, almost every person on the planet can create a solid speech in of an eye. Nevertheless, if one started to ~~use~~ ^{consume} it on a dai utilise it on a daily basis, the brain would stop working or this individual would become complacent that ~~to~~ they would quit trying to analyse the situation, notwithstanding the amount of almost identical and pointless encouraging texts.

Speaking of daily consumption, apps like Chat GPT are rather commonly used by students in order to save time on their homework nowadays which sounds like a disaster ~~to~~ to the whole point of education. The pupils and young adults ~~are~~ might lose the ability to think themselves inasmuch as lose sight of creativity due to the incidents of AI generating ^{ed} of poems. It begs a question: does an hour of your time cost your brain and soul?

In conclusion, I would like to claim that even though the invention of neurons has ~~had a big~~ been a huge technological breakthrough, not being used wisely, it can become the imminent threat to the our descendants and humanity ~~in~~ itself.
