Nowadays chat GPT is a popular thing that helps people in their work. Some experts think that chat GPT may lead to ~~the~~ down fall of education. I disagree with that. To prove my point, I give some arguments.

First of all, I would like to say that chat GPT helps people when they do their projects. For example, if they do not know how to write on a good language, they will use GPT chat. It gives uses your phrases and gives you a text, which people can use for their project.

Secondly, people can use GPT chat when they want to know more about some facts that they find. For example, a person want to learn English history. He writes into chat the historic fact and chat gives him a state of this fact. ~~The~~ person reads it and writes a conclusion.

~~Final~~ Thirdly, people can use GPT chat to check their letter on grammar mistakes. If you have some fails, the chat will make remarks and will give the right text. If you do not have any mistakes, the chat will write that text is right.

In conclusion, I firmly believe that in the future there will be more new things that in the GPT chat that will help people in the education.
