ТВОРЧЕСКОЕ ЗАДАНИЕ

Artificial intelligence is developing rapidly nowadays, which led to several concerns arising. One of said concerns is the fear that AI, such as chat GPT may lead to the downfall of education and critical thinking. I can not say I agree with the claim, but it is not without credibility.

Data has shown that children today are less mentally developed than older generations. Chat GPT may be partially responsible for that since it can write essays and home assignments for students, which leads to them being less educated.

On the other hand, ~~we can't~~ scientists can not prove how big of an impact AI has on children compared with other factors. All AI does is give students an option not to work and they are ultimately responsible for deciding what to do.

In the end, even though there is scientific basis for the idea, it is too early to fear that education and critical thinking will collapse. Chat GPT is a useful tool and the AI is not responsible for humans' poor choices. The most logical thing to do to prevent ~~the downfall~~ of the downfall of human intelligence is to limit your own and your children's access to chat GPT and other AI programs.
