ТВОРЧЕСКОЕ ЗАДАНИЕ

Extraterrestrial contact.

The question whether intelligent life forms exist on other planets arises quite frequently nowadays. Some scientists insist that messages should be sent to ~~to~~ contact ~~with~~ extraterrestrial organisms. However, it is arguable to what extent it should be done.

One group of scientists claims that ~~it~~ it is necessary to send as many signals and messages ~~as possible~~ into the outer space as possible, so that the probability of reaching the alien life increases. Some scientists believe that all the resources of international space research companies should be channelled into multiple interplanetary communication attempts.

However, there is also an opinion that all the means of sending messages to intelligent life forms on other planets are absolutely useless. Some scientists assume that if alien civilizations exist their level of intelligence and development is so high that it cannot be ~~be~~ understood by human species. That is why it is better to stop sending signals very frequently.

All in all, personally, I am rather inclined to think that sending messages to the cosmic space once in a while may possibly result in some scientific breakthroughs or even interplanetary contacts. In my opinion, such attempts are not completely useless. For this reason it is better to continue ~~the~~ trying to contact ~~the~~ extraterrestrial life forms.

20	<p>Suggested title for the story: 'Pragmatic Nathalie'. I believe that the title would be appropriate as the story is about a young pragmatic woman who manipulates men around her in order to get the maximum profit out of the situation. She uses her attractive look and genuinely-looking smile to convince her surrounding in her innocent innocent attitude.</p>
