ТВОРЧЕСКОЕ ЗАДАНИЕ

While someone argue that Chat GPT could lead to the downfall of education and critical thinking, I believe that its impact depends on how it is used. Chat GPT can be a valuable tool for enhancing learning experiences, providing instant access to information, and stimulating critical thinking through engaging conversations. It can facilitate exploration of new ideas, foster activity, and encourage deeper understanding of complex concepts.

However, over-reliance on Chat-GPT for information without proper verification may lead to different mistakes due to the fact that this "helper" is still developing by professionals.

Ultimately, the responsibility lies in how educators and students choose to integrate Chat GPT into educational settings. When used thoughtfully as a supplement to traditional ~~experiences~~ ~~with~~ thinking methods, it can enhance educational experiences and stimulate critical thinking. Balancing its benefits with the need for independent research, analysis and discussion is crucial in ensuring that Chat GPT contributes positively to education without overshadowing critical thinking skill and education.
