**ТВОРЧЕСКОЕ ЗАДАНИЕ**

I think that Chat GPT won't lead to the downfall of education and critical thinking. This idea is rather weird, because it isn't true. I consider that if people use Chat GPT for doing some tasks, they will have more free time to concentrate on things that they need. For example, people need to do a literature task, but they haven't read a novel which is connected with the task. So, they can use Chat GPT to help them to complete the task. Then they will do some preparation for the subjects they are interested in and they want to learn and to pass the exam of this subject. While having free time, people can develop their skills and ~~new~~ knowledge of something. In my opinion, concentrating on subjects you need will help you to pass the exam on excellent marks. That's why your brain will be developing. People will learn many new things that can help them in the future. Actually, some knowledge can help you to choose your future job. Also, it gives you ready information. So, you don't have to find it by yourself. You just need to read it and maybe to learn by heart. That's why Chat GPT is useful.
