ТВОРЧЕСКОЕ ЗАДАНИЕ

Nowadays the AI technology is evolving very fast. One of the most popular AI systems, Chat GPT, is able to talk to users in a very similar way a human ^{can} could, and even write essays on almost every topic possible. Many students ~~begin~~ began to use Chat GPT for ~~write~~ do their schoolwork, and some people believe that this could lead to the downfall of education. As for me, I do not think so, and here are the reasons why.

Firstly, even though Chat GPT is able to give you almost any information, it ~~isn't~~ ^{is not} able to produce anything new. The AI systems lack creativity and can only work with information that was given to them. This means that Chat GPT has not got much more use than a wikipedia page. It can only help you with simple projects, not anything complex and creative.

Secondly, new AI systems are coming out very often and scientists tell that soon an AI system that detects the work of other AI systems will be invented. It means that teachers would be able to prevent students from using Chat GPT in their schoolwork.

In conclusion, I believe that Chat GPT will not lead to the downfall of education, but could help students deal with monotonous work.
